

"Bottles & Cans, Nick's Your Man"

Rabbit Recycling

0478 525 433

Be a better recycler No Fuss, No Hassle

In South Australia, recycling contamination, or when someone places incorrect items in the recycling bin, is a problem that can lead to the entire truck load being sent to landfill, as contaminated materials cannot be properly processed, reducing the overall recycling rate and impacting environmental efforts.

What is recycling contamination?

It's when items that are not recyclable are placed in the yellow recycling bin, such as plastic bags, food waste, or loose shredded paper.

You can guarantee that your 10c recyclables don't end up in landfill by using Rabbit Recycling! When your Rabbit Recycling Bin is full we'll pick it up and leave you with a clean empty bin. The service is free, and is funded in part by your 10c cans.

Rabbit Recycling is a NDIS funded micro-enterprise owned by Nick. To find out more, call John on 0478 525 433, go to <https://rabbitrecycling.online> or scan the QR code below.

Nick with some freshly cleaned bins,
ready to go!
